

2003 and earlier Ethyl Grants

Recipients of October 2003 Ethyl Grant

§ Hemingford Cooperative Telephone Company- Hemingford, Neb. is working very closely with Hemingford in Progress (HIP), a community organization that contributes to the town's economic development and beautification. The grant of \$1,000 will purchase 50 gallons of paint and supplies, provided at-cost by the local hardware store, for an effort known as "Paint the Town (see photo above for past year's effort)." Through the work of volunteers from the telephone co-op and the local high school, buildings will get a free new paint job. The grant will be matched with donations from HIP, the telephone co-op and in-kind donations of labor.

§ Roome Telecommunications, Inc.- Halsey, Ore. along with the city, the Brownsville Recreation Center and several other volunteer-based organizations is working to finish making Halsey Memorial Park ADA-accessible. A local contracting company has pledged in-kind labor and the concrete will be provided at a deeply discounted price. The \$2,000 grant will be recognized by a plaque to be placed in the park.
